

# BOOST

POWDERED OXY BOOSTER

## DESCRIPTION:

In today's modern environment, homeowners and business owners demand not only a clean room, but a green one too. By combining a residue-free oxygen generating powder with the all-natural green solvent d'limonene, Boost has the power to increase almost any detergent's ability to lift difficult stains such as blood, oil, urine, and more all without having to handle specialized detergents or spotters.

Boost can also be used on its own! Just dissolve in water and let the oxy-based formula clean up tough soils and stains without worrying about harsh fumes or sticky residues being left behind. The d'limonene and surfactants in Boost will also attack the source of the odor, leaving behind a pleasant citrus fragrance.

## DIRECTIONS:

For boosting detergent solutions: Add 1 to 2 oz. per gallon of cleaning solution.

For use as a spotter: Add 2 oz. of Boost to a quart of water. Mix and use immediately. DO NOT store mixed solution, product will pressurize in an enclosed container. Dispose of by flushing down a sink/drain.

Keep container closed when not in use. Do not use in solvent based products.

## SPECIFICATIONS:

**Appearance:** Off-white powder

**Odor:** Citrus

**pH:** 10-11

**Storage:** Store in tightly closed containers away from heat.

**Freeze/Thaw:** Will recover

## PACKAGING OPTIONS:

- 4/8# Jar
- 40# Bucket
